SWOT Analysis of existing System

Strengths

- Dedicated IT workforce (40 IT + 18 support staff)
- Established legacy databases with critical records
- National reach (260 shops, 4,000 staff)
- Positive work culture supporting digital adoption

Opportunities

- Cost reduction via cloud migration
- Centralized CRM for better engagement
- E-commerce potential for donations
- Data-driven insights and analytics

Weaknesses

- High IT costs (£25.7M annually)
- Significant downtime (15 days/year = 1,500 staff days)
- Fragmented systems (5 payroll systems)
- Limited digital strategy and e-commerce absence

Threats

- Staff resistance to change
- Cybersecurity risks during migration
- Potential migration disruptions
- GDPR compliance challenges

SWOT Analysis of proposed System

Strengths

- Scalable cloud services reducing resource waste
- Cost-efficient OpEx model
- Unified systems (CRM, HRM, payroll)
- 99.9%+ uptime SLA guarantees
- Advanced analytics with Power BI

Opportunities

- BPaaS automation innovations
- Built-in compliance tools
- Sustainable green data centers
- Enhanced fundraising through CRM

Weaknesses

- Initial migration and training costs
- Potential vendor lock-in risks
- Staff upskilling requirements
- Internet connectivity dependency

Threats

- Security misconfigurations
- Cultural resistance to change
- System underutilization without training
- Complex legacy data migration

SaaS, PaaS & IaaS service provision analysis

SaaS

PaaS

IaaS

Recommended commercial service provider

Microsoft Azure is the best fit for CVS due to nonprofit discounts, strong UK data protection (GDPR compliance), and easy integration with existing Microsoft tools. Its security, scalability, and eco-friendly operations make it ideal for CVS's digital transformation.

Cost analysis

Service/Item	Estimated Cost (3 Years)
Microsoft 365 (Licensing for 4000 staff)	£1,200,000
Azure Virtual Machines, Backup & Storage	£2,500,000
Dynamics 365 CRM & HRM (SaaS)	£1,500,000
E-Commerce Portal Development (PaaS)	£1,000,000
INaaS/BPaaS Design and Rollout	£2,000,000
Staff Training, Change Management	£800,000
Cloud Consultancy, Migration & Testing	£500,000
Contingency (5%)	£500,000
Total	£10,000,000

And the benefits listed:

- A full system transition over 3 years
- Long-term IT cost reduction
- Elimination of legacy support costs
- Improved efficiency and centralization

INaaS & BPaaS services & development analysis

BPaaS

BPaaS will automate key workflows such as volunteer onboarding, donor engagement, and e-commerce logistics. Tools like Power Automate and Dynamics 365 will streamline scheduling, receipts, packaging, and campaign tracking—boosting efficiency across departments.

INaaS

INaaS will centralise CVS's data using Azure Data Lake and Power BI dashboards. This enables real-time insights, GDPR-compliant data governance, and self-service reporting—empowering staff to make informed decisions without relying on IT.

Sustainability Discussion

Microsoft Azure runs on 100% renewable energy and aims to be carbon negative by 2030. CVS can reduce its digital carbon footprint using Azure's Emissions Impact Dashboard, aligning its IT strategy with sustainability and donor trust.

Thank You
